

I-Sample valves

I-Sample valves

Features and benefits

- Diaphragm replacement can be completed in seconds
- Designed with through-the-chamber CIP/SIP via 1/4 inch to 1/2 inch ports, ensuring a truly representative sample every time
- USP Class VI EPDM or Silicone diaphragm
- Improved tank cleanability, because the diaphragm seals on the ID at the vessel wall
- Integral non-adjustable travel stops
- Replacement capabilities that can be completed in seconds
- Offers full drainability when installed in an Ingold(tm) port
- Designed with through-the-chamber CIP/SIP via 1/4-inch to 1/2-inch ports, ensuring a truly representative sample every time.
